

Prestigious Projects in Kuwait

New Central Bank of Kuwait Headquarters, Kuwait

Location: City of Kuwait, Kuwait

Consultant: Pan Arab Consulting Engineers (PACE)

Contractor: China State Construction Engineering

MEP Contractor: Kharafi National

As a new landmark on Kuwait City's skyline, the Central Bank of Kuwait will be a symbol of the country's significant economic power in the 21st century.

The triangular, truncated pyramid tower is intersected by a podium that contains reception and banking halls, conference facilities, dining and banquet rooms, and a museum.

The two stone walls of the southern, city-facing tower reduce energy consumption by functioning as a heat sink to absorb the harsh Kuwaiti sun during the day and use the stored heat to keep away the cold at night.

An all-glass northern elevation protects the interior from solar gain while providing panoramic views across the Arabian Gulf. At night, the top of the building will glow like a beacon.

The works were awarded in March 2014 and completed in December 2015.

TAB Works include:

- 80 Air Handling Units
- 167 Fan Coil Units
- 187 Fans
- 5 Chillers
- 19 Pumps
- 4 Cooling Towers
- 162 VAV Terminals
- About 3500 Air Terminals
- About 320 Balancing Valves
